Environmental Product Declaration (EPD)

A New Standard for Sustainable Construction

Sustainable construction is no longer just about making the right environmental choice; it's about proving it with independently-verified data.

That's why we're proud to announce that SRC Group's recycled aggregates, sands, sub-base, clay, topsoil and subsoil have achieved Environmental Product Declaration (EPD) certification. This not only marks an important milestone in our sustainability journey; it also gives our customers a greater level of insight into the environmental performance of our recycled materials.

The UK's
Circular Economy
Construction Business

Environmental Product Declaration (EPD)

HOW DOES AN EPD BENEFIT OUR CUSTOMERS?

- ✓ Independently-verified environmental information for sustainability reporting
- ✓ Supports sustainable procurement
- ✓ Provides data for carbon and embodied-impact calculations
- ✓ Helps to meet certification requirements such as BREEAM and LEED
- ✓ Confidence in the environmental performance of your materials

SRC EPD-CERTIFIED PRODUCTS

RECYCLED AGGREGATES | RECYCLED SANDS | RECYCLED SUB-BASE
RECYCLED CLAY | RECYCLED TOPSOIL & SUBSOIL

BUILDING BETTER, TOGETHER

For over 30 years SRC Group has been recycling construction waste and since 2020 we've diverted 6 million tonnes of waste away from landfill; supporting a more sustainable future for the construction industry.

Today, our circular economy model means that those recovered materials are transformed into high-quality products that support projects across the UK. At the moment we have an 89% reuse rate for all materials processed through our in-house recycling facilities.

Virgin sand and gravel carry a Global Warming Potential of around 5 kg CO_2e per tonne, compared to 0.00 kg CO_2e for our recycled materials. Since 2020 that difference has helped us to save approximately 30 million kg of CO_2e; the equivalent of around 16.7 million miles of HGV travel. Receiving EPD certification is the next step in this exciting journey towards creating a more sustainable sector for us all.

To find out more about the independently-verified environmental performance of our recycled products, you can download our Environmental Product Declaration by scanning the QR code.
